Key Observations

- Sales and Profit Distribution:** Sales range from \$0.44 to \$22,638.48, with a mean of \$229.86. Profit varies from -\$6,599.98 to \$8,399.98, indicating potential loss-making transactions.
- Category Insights:** Technology leads in sales (\$836,154), but Office Supplies have the highest transaction count (6,026). Furniture has the lowest profit margin.
- Regional Performance:** The West region generates the highest sales (\$725,457) and profit (\$108,418), while the South region lags.
- Shipping Modes:** Standard Class is the most used shipping mode, contributing to the highest sales and profit.
- Discounts:** Average discount is 15.62%, with a maximum of 80%. High discounts correlate with negative profits, notably in the Furniture category.

Next Steps

- Profitability Analysis:** Investigate loss-making transactions to identify patterns or common factors.
- Discount Strategy:** Analyze the impact of discounts on sales and profit, especially in the Furniture category.
- Regional Strategy:** Explore why the South region underperforms and develop targeted strategies.
- Shipping Optimization:** Assess the cost-effectiveness of different shipping modes.

Clear

may have higher instances of losses. For example, the "Tables" sub-category has a negative total profit, indicating frequent loss-making transactions.

3. **Regions and States:** Some regions or states might have more loss-making transactions. For instance, analyzing the profit by state could reveal states with negative total profits.

1. **Discount and Sales:** Discounts are generally used to boost sales volume. However, the dataset shows a mean discount of 0.1562 with a maximum of 0.8. While discounts might increase sales volume, they can also reduce the revenue per unit sold, potentially affecting overall sales revenue.

2. **Discount and Profit:** High discounts can significantly impact the profit margin. The
